

Green Moments

February 2018

National Heart Month

Hearts are often associated with February because of Valentine's Day. However, caring for our actual “tickers” is often overlooked. Do you know simple things, like clean air, are important for “heart health”?

Feb. 2

Environment-Related Diseases

Environmental Health

National Green Week

National Green Week can be any week in February. Pick a week to try out a new “green” action or educate others about the environment. If you are having trouble deciding which week should be “Green Week,” make it simple—celebrate all month long.
